Installation Instructions for the 3001 Street Light Package

1. *Warning*: Before attempting to install units, please ensure power to the outlet box is off.
2. Carefully unpack and identify all parts, referring to the parts list included with your package.
3. Use three bolts, three nuts, and three washers to install the base into the ground.
4. Install the post onto the base, using the three screws provided.
5. Firmly attach the outlet wire from the lamp fixture to the main power supply.
6. Attach the fixture to the pole using the screws provided.
7. Install light bulb.
    a. Note: the bulb must not exceed wattage specified on fixture label.
8. Replace lamp access cover or lamp glass cover, using the screws provided.
9. Turn on the power.

Note: The wire link is only 8-12 feet long, so adjustments must be made for poles 10-12 feet in height.

***Disclaimer**: All electrical connections must be in accordance with local codes or the national electrical code. If you are unfamiliar with the installation method and the connection of electrical wire, please contact a qualified, licensed electrician to assist you.*
